

Special Issue

Towards a Personalized Medicine for the Diagnosis and Management of Gynecological Cancers

Message from the Guest Editors

This Special Issue is aimed toward developing personalized medicine for the diagnosis and management of gynecological cancers. Gynecological cancers are the most commonly occurring form of cancer among women worldwide. They impact quality of life in affected patients, disrupt women's reproductive systems, and have a limited response to treatment at an advanced stage. However, new technologies and research in the fields of prevention, diagnosis, and treatment are changing this context by supporting both specialists and the patient during their medical journey. In an ever-more digital- and AI-oriented era, the main challenge of professionals is to tailor the diagnosis and treatment experience to suit individual patients by personalizing medicine used in the management of gynecological cancer women. Researchers working in the field of gynecological cancers are encouraged to submit original articles and reviews related to this Special Issue's scope. Communications, systematic reviews, and meta-analyses are also welcome.

Guest Editors

Dr. Diego Raimondo

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
