

## Special Issue

# The Application of Laparo-Endoscopic and Robotic Surgery in Cancer Treatments and Research

### Message from the Guest Editor

Due to the introduction of and global spread of minimally invasive surgical approaches and platforms, surgical treatments in the management of cancer have rapidly advanced over the last three decades. Laparo-endoscopic approaches and newly developed robotic platforms in cancer surgery have reportedly conferred patient-friendly, minimal invasiveness, superior perioperative outcomes and acceptable oncologic outcomes in selected patients compared to those of conventional open surgery. On the other hand, along with technical refinements and innovations, the expansion of surgical indication is still underway in minimally invasive surgery for ill-conditioned cancers and patients. This Special Issue will highlight the present status, recent advances, innovative techniques, clinicopathological and molecular research, and future innovation and research seeds in minimally invasive surgical approaches to cancer treatments in a variety of organs.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
