# From Bench to Bedside in the Management of Cholangiocarcinoma

## Message from the Guest Editors

Cholangiocarcinoma (CCA) is a relatively rare tumor arising from the biliary tract epithelium. Deeply heterogeneous in morphology, location, and clinical impact, CCA's incidence and mortality have progressively increased in the past decades, with little progress on the therapeutic end, leading to a dismally low incidence-to-mortality ratio. Given the recent surge in research on CCA, the Special Ossue aims to cover the currently most challenging topics, ranging from basic and translational research to diagnosis, therapy, and management of advanced disease. The current issue is focused on bench-to-bedside translation and clinical applicability of the matters analyzed, aiming to expand on topics such as challenges in the diagnosis of perihilar CCA, the role of contrast-enhanced ultrasonography in the diagnosis of intrahepatic CCA, the challenges of borderline resectability in surgical management, the role of locoregional therapy in intrahepatic CCA, the potential advent of novel systemic therapies, or the management of challenges in advanced cholangiocarcinoma.

## **About the Journal**

### Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

#### **Editor-in-Chief**

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

#### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
