# **Special Issue**

# Immunometabolic Disorders and Early-Onset Gastrointestinal Cancer: Etiology, Incidence, Survival and Disparities

# Message from the Guest Editor

This Special Issue pertains to the growing concern of gastrointestinal (GI) cancers, such as colorectal, gastric, liver, and pancreatic cancers, in younger populations and their connection to immunometabolic disorders. Genetic predispositions, as well as environmental and lifestyle factors, may play significant roles in the development of these GI cancers. During cancer progression, immunometabolic disorders may serve as early clinical indicators that trigger and promote cancer development. However, the reasons for the rising incidence of GI cancers in younger populations remain unclear.

# **About the Journal**

## Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### **Editor-in-Chief**

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
