New Insights and Future Directions in Palliative Care across the Cancer Continuum

Message from the Guest Editors

Palliative care is an integral component of comprehensive cancer care. Its clinical practice is rooted in the philosophy of improving the physical, mental, spiritual, and psychosocial well-being of patients and their family members. Over the last few decades, palliative care has evolved from a specialty that focused almost exclusively on end-of-life care to one delivering comprehensive supportive care to patients throughout the disease trajectory. A growing evidence base has shown that integrating palliative care early on in the disease trajectory can help to alleviate symptoms, improve patient and caregiver quality of life and satisfaction with care, enhance illness and prognostic understanding, reduce healthcare costs, and improve survival. Original research papers and reviews are welcome. We will accept manuscripts from a variety of disciplines, including (but not limited to) nursing, medicine, epidemiology, psychology, health services, social work, implementation science, and ethics/public policy.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
