# Advances in the Management of Patients with Melanoma and Brain Metastases

### Message from the Guest Editor

This Special Issue focuses on recent developments in the clinical management and biological understanding of melanoma brain metastases. We invite submissions of both original research and review articles addressing the following areas:

- Systemic Therapies:
  - Novel therapeutic approaches;
  - Combination treatment strategies;
  - Overcoming drug resistance.
- Radiation Therapy:
  - Novel radiation therapy techniques and treatment paradigms.
- Surgical Interventions:
  - Novel surgical and interventional techniques.
- Biological Insights:
  - Mechanisms of brain metastasis formation;
  - Neurotropism in melanoma;
  - Tumor microenvironment interactions.
- Translational Research:
  - Biomarker discovery and validation;
  - Preclinical models of melanoma brain metastases;
  - Drug delivery across the blood–brain barrier.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
