Oncologic Emergencies: The Emergency Care of Cancer Patients

Message from the Guest Editors

As the number of patients with active cancer is expected to increase, so are visits to the emergency departments and other high-acuity urgent care facilities. Considering the complexity of the presented emergency problems caused by cancer, antineoplastic treatments, and comorbidities, the proper diagnosis and management of oncologic emergencies are vital to addressing the root causes to prevent or minimize any morbidities and mortalities related to these emergency encounters. This Special Issue focuses on common conditions among cancer patients in emergency departments and other urgent care centers. These conditions include, but are not limited to, the following: 1) infection, sepsis, and febrile neutropenia; 2) treatment-related adverse events of cytotoxic chemotherapy, radiotherapy, and immunotherapy; 3) metabolic emergencies, including tumor lysis syndrome and humoral paraneoplastic syndromes; 4) cancer-related complications including venous thromboembolism, malignant spinal cord compression, thoracoabdominopelvic viscus obstructions, and superior vena cava syndrome; and 5) cancer pain.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
