

Special Issue

From Molecular Insights to Cancer Treatments: Progress in Translational Science

Message from the Guest Editors

Advances in cancer biology continue to drive the discovery of novel therapeutic strategies, yet significant challenges remain in translating these insights into effective treatments. This Special Issue explores the intersection of cancer biology, early discovery, and translational research, highlighting innovative approaches in translational sciences. We welcome original research and review articles covering key aspects of basic scientific discoveries, from identifying new molecular targets to preclinical- and early-clinical-stage investigations. Topics of interest include mechanisms of cancer progression, novel drug candidates, resistance pathways, and strategies to improve therapeutic efficacy. By synthesizing cutting-edge research, this issue aims to foster interdisciplinary dialogue and accelerate the development of next-generation cancer therapies.

Guest Editors

Prof. Dr. Sanjay V. Malhotra
Dr. Dhanir Tailor
Dr. Annah Rolig

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
