

## Special Issue

# Developments in the Management of Gastrointestinal Malignancies

### Message from the Guest Editor

Gastrointestinal (GI) malignancies are a major cause of morbidity and mortality worldwide. Treatment of these malignancies often consists of multimodal therapy with a combination of chemotherapy, radiation, and surgery. In addition, immune-based therapies are being utilized at increased rates in patients with GI malignancies. In this Special Issue, we focus on advances in the multimodal treatment of patients with GI malignancies, including patients with localized and metastatic disease. Comments are encouraged on the role of biomarkers and molecular profiling techniques to help guide therapeutic decisions as well as emerging novel therapies. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
