

## Special Issue

# Endometrial Cancer Therapy: Foundations and Future Directions

### Message from the Guest Editors

The Special Issue *Endometrial Cancer Therapy: Foundations and Future Directions* explores the rapid evolution of treatment approaches over the past decade. The incidence of endometrial cancer is rising due to increased life expectancy and its link to obesity, particularly in high-income countries. Advances across multidisciplinary fields have led to significant progress, especially in pathology, where new molecular classifications influence staging and treatment choices. Key developments have also emerged in surgery, radiotherapy, chemotherapy, and immunotherapy. Patient survival, treatment toxicity, and quality of life are now critical considerations. This issue aims to present the current treatment landscape and future directions. We invite high-quality reviews and original articles to expand our knowledge of this prevalent gynecological cancer.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
