The Cellular Ecosystem of Cancer: New Insights into Cell Biology

Message from the Guest Editors

Dysregulation of key cellular organelles—including the endoplasmic reticulum (ER), mitochondria, lysosomes, Golgi apparatus, and others—has emerged as a critical factor in cancer progression. Cancer cells actively remodel these organelles to sustain rapid proliferation and to reshape the tumor microenvironment. A deeper understanding of how cancer cells remodel organelle structure and function, and the key regulators involved in this process, will open new avenues for therapeutic intervention. This Special Issue will highlight recent advances in uncovering the diverse roles of cellular organelles in cancer biology and their potential as novel therapeutic targets.

Guest Editors

Dr. Xiaochao Tan

Department of Medicine, Tulane University School of Medicine,
Louisiana Cancer Research Center, New Orleans, LA, USA

Dr. Guan-Yu Xiao

Department of Toxicology and Cancer Biology, The University of
Kentucky, Lexington, KY, USA

Deadline for manuscript submissions

30 September 2026

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
