New Approaches to Surgical Treatment and Care for Urological Cancer

Message from the Guest Editors

With the rising incidence of urological cancers driven by an aging population, there is an urgent need to adapt surgical treatment and care to meet the complex needs of older adults. As surgical techniques in urological cancers evolve—embracing minimally invasive procedures, precision medicine, and enhanced recovery protocols—the role of nursing is undergoing a profound transformation. This Special Issue seeks contributions that examine innovative surgical interventions and evidence-based nursing strategies that address age-related comorbidities, functional decline, and the need for holistic, patient-centered care in this growing demographic. We welcome original research, clinical insights, case studies, and reflective pieces that highlight healthcare professionals' role across the surgical care continuum—from preoperative preparation to postoperative recovery and long-term survivorship. Topics may include perioperative care models, patient education and health promotion, complication management, interdisciplinary collaboration, and the integration of new technologies into nursing practice.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
