

Special Issue

Patients' Perspective in Gynecological Cancer

Message from the Guest Editor

This Special Issue will explore how the perspectives and expectations of patients play crucial roles in treatment decision-making for women with gynecological malignancies. Despite growing awareness of this issue, research on patient perspectives in breast, cervical, ovarian, and endometrial cancers remains limited. This Special Issue will highlight the importance of these topics, focusing on clinical trials, patient surveys, and expert statements. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Patient perspective;
- Expectations;
- PROMs;
- Quality of life;
- Best supportive care.

We look forward to receiving your contributions.

Jolijn Boer

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
