

## Special Issue

# Patients' Perspective in Gynecological Cancer

### Message from the Guest Editor

This Special Issue will explore how the perspectives and expectations of patients play crucial roles in treatment decision-making for women with gynecological malignancies. Despite growing awareness of this issue, research on patient perspectives in breast, cervical, ovarian, and endometrial cancers remains limited. This Special Issue will highlight the importance of these topics, focusing on clinical trials, patient surveys, and expert statements. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Patient perspective;
- Expectations;
- PROMs;
- Quality of life;
- Best supportive care.

We look forward to receiving your contributions.

---

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
