Survivorship and Life with Colorectal Cancer

Message from the Guest Editors

Colorectal cancer ranks as the third most common cancer globally. The number of individuals surviving and living beyond colorectal cancer is on the rise due to improved diagnosis and treatment, as well as an aging population. The nature of colorectal cancer and its treatment, including radiotherapy in the pelvic region, chemotherapeutic agents, and surgical resections to the colon and rectum, presents unique challenges for individuals post-treatment. These challenges include neuropathy, fecal urgency and incontinence, fatigue, sexual dysfunction, and difficulties in managing a stoma, among many others. These challenges can have a widespread impact on a person's life, affecting social interactions, body image, work, daily activities, mental health, sleep, and many more. We are pleased to invite you to this Special Issue, which aims to bring together experts in the field of colorectal cancer survivorship to facilitate a dialogue that contributes towards our understanding of the effective monitoring and management of treatment sequelae, meeting supportive care needs and optimizing the quality of life.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
