

Special Issue

New Diagnostic and Therapeutic Perspectives of Gynecological Carcinomas

Message from the Guest Editor

This Special Issue of *Cancer* aims to explore diagnostic and therapeutic innovations in gynecologic carcinomas. Despite advances in understanding their molecular basis, the treatment and management of these malignancies remain a significant challenge. The ultimate goal is to explore new strategies to improve early diagnosis, identify predictive biomarkers, and develop personalized approaches, focusing on immunotherapy, targeted therapies, and precision medicine. In addition, innovative aspects in surgery, radiation therapy, and integrative therapies will be addressed. We welcome original contributions and reviews highlighting the latest findings, with the intension of providing a comprehensive overview of future opportunities to improve patients' survival and quality of life. Researchers are invited to contribute to this Special Issue with novel original trials, reviews, and meta-analyses to raise awareness of gynecological cancer. We invite oncologists, gynecologists, biologists, nurses, psychologists, and researchers in related fields to contribute their robust scientific manuscripts. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
