Special Issue

The Changing Paradigms in the Management of Thyroid Cancer

Message from the Guest Editor

In recent years, our understanding of thyroid cancerincluding the differentiated, anaplastic, and medullary subtypes—has significantly advanced, largely due to discoveries regarding the molecular mechanisms driving tumor development, proliferation, and survival. Simultaneously, thyroid cancer incidence has risen. prompting a shift toward personalized treatment approaches rather than a standardized strategy. Active surveillance is increasingly being recognized as a viable option for managing low-risk differentiated thyroid cancers, alongside less invasive surgical techniques and selective radioiodine use. Meanwhile, new and highly selective targeted therapies are offering new hope for patients with aggressive thyroid cancers, including metastatic and anaplastic cases. This Special Issue will explore the evolving treatment landscape, highlighting innovative therapeutic strategies that are shaping current clinical practices, as well as future treatment paradigms.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
