Contemporary Management for Gallbladder Cancer: From Diagnosis to Treatment (2nd Edition)

Message from the Guest Editor

Gallbladder cancer (GBCA) is a rare but aggressive disease with a propensity for early invasion of the adjacent organs and dissemination to lymph nodes and peritoneal surfaces. As patients with GBCA often remain asymptomatic until the advanced stage, it has historically been considered an incurable disease with dismal prognosis, and the clinical attitude towards GBCA has been characterized by pessimism in the past. In recent decades, however, chemotherapy for biliary cancer has evolved, and more effective regimens are more commonly used in the management of GBCA. Furthermore, along with recent increased use of computed tomography or abdominal ultrasound in general practice, the number of incidentally discovered patients with early stage GBCA has been increasing. Thus, in this Special Issue, we call for papers on the contemporary management of patients with GBCA and its outcomes. The scope includes modern multidisciplinary approaches for advanced GBCA, strategies for early GBCA, and other translational research for novel diagnostic/therapeutic strategies.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
