

Special Issue

Advances in the Management of Pelvic Tumors: 2nd Edition

Message from the Guest Editors

This Special Issue is the second edition of the previous Special Issue entitled “[Advances in the Management of Pelvic Tumors](#)” Pelvic tumors are quite frequent conditions and include prostate, bladder, uterine, ovarian, rectal and anal malignancies. The treatment of tumors occurring within the pelvis can be challenging. This Special Issue will cover advances in the management of pelvic cancers, including surgical, medical and radiation treatments. It will focus on organ-confined and locally advanced diseases. Novel findings in robotic surgery, as well as medical and personalized therapies, are welcomed.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
