

Special Issue

The Role of Endoscopy in Gastrointestinal Cancers

Message from the Guest Editors

Cancers is launching a Special Issue focused on the role of endoscopy in gastrointestinal cancers. Endoscopy has shifted from having a central, but still limited, role in diagnosis to an increasing and exciting participation in cancer therapy. At present, endoscopy has not only a central role in therapeutic decision-making in gastrointestinal cancer, but a direct therapeutic involvement in the treatment and palliation of these diseases. We are pleased to invite you to send a manuscript for this Special Issue dealing with the role of endoscopy and endoscopic procedures in digestive cancers. In this sense, papers addressing the broad topic of endoscopy in gastrointestinal cancers, diagnostic or therapeutic, are welcomed. From purely diagnostic procedures to advanced therapeutic endoscopy, the range of possible manuscripts is wide. This Special Issue aims to publish papers covering novelties for the diagnosis of early cancers, such as colorectal cancers, upper GI tract tumors and biliary-pancreatic disease, as well as insights into staging and endoscopy-based therapeutic alternatives that have arisen in this rapidly evolving field.

Guest Editors

Prof. Dr. Eduardo Redondo-Cerezo

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
