

Special Issue

Recent Advances in Oncology Imaging: 2nd Edition

Message from the Guest Editors

Medical imaging is playing an ever-increasing role in clinical, experimental, and translational oncology for population surveillance, patient screening, diagnosis assurance, cancer staging, therapeutic evaluation, prognosis assessment, and development of novel anticancer approaches. Recent advances in oncologic imaging include the following: (1) multimodality (US, CT, MRI, PET, SPECT, optical imaging) and multiparametric (morphological, functional, metabolic) applications; (2) precision medicine driven by molecular imaging and nano-technologies; (3) theragnostics that utilize molecular imaging to identify cancer patient-specific biomarkers to guide individualized treatment decisions; and (4) radiomics assisted by artificial intelligence, big data analytics, and deep learning for multi-feature characterization. This Special Issue will update and highlight the state of the art with respect to cancer imaging.

Guest Editors

Dr. Li Liu

Department of Radiology, The University of Texas Southwestern Medical Center, Dallas, TX, USA

Prof. Dr. Yicheng Ni

Department of Radiology, Affiliated Zhongda Hospital, Southeast University, Nanjing, China

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
