Research on Current Progress in Penile Cancer

Message from the Guest Editors

Penile squamous cell carcinoma (PSCC) is an aggressive cancer associated with significant treatment morbidity and psychosocial stress. Metastatic PSCC has a dismal prognosis and its treatment relies on the utilization of conventional treatments employing a multidisciplinary approach. However, there is a paucity of actionable therapeutic or salvage systemic options. Thus, there is an urgent need to expand knowledge on the genomic and molecular landscape of PSCC, as well as increase the awareness of current trials and research on therapeutic paradigms for PSCC. In addition, the impact of PSCC on the quality of life of survivors and their family needs to be examined further. With this Special Issue, we hope to provide a comprehensive and contemporary review on current management strategies for this rare disease.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
