

## Special Issue

# Prostate Cancer: Molecular Imaging and Magnetic Resonance Imaging (MRI)

### Message from the Guest Editors

Prostate cancer is the second most commonly diagnosed cancer in men worldwide. Magnetic resonance imaging (MRI) and molecular imaging have revolutionized the diagnostic-therapeutic pathway of prostate cancer. MRI has transformed prostate gland imaging, offering high-resolution anatomical details and functional information. Molecular imaging techniques, such as positron emission tomography (PET) and single-photon emission computed tomography (SPECT), enable the visualization and characterization of specific molecular targets and metabolic processes associated with prostate cancer. The integration of molecular imaging and MRI holds great potential in improving the accuracy of prostate cancer diagnosis, risk stratification, and treatment planning, ultimately leading to more personalized approaches and improved patient outcomes. This Special Issue aims to shed light on the current state of molecular imaging and MRI for prostate cancer. By showcasing the latest research and advancements in this field, we strive to advance the field of molecular imaging and MRI for prostate cancer and pave the way for more precise and personalized approaches in its management.

### Guest Editors

Dr. Marco Paciotti

1. Department of Urology, Humanitas Research Hospital, IRCCS, Rozzano, Milan, Italy
2. Onze Lieve Vrouw Hospital, Aalst, Belgium

Dr. Davide Maffei

1. Department of Urology, University College London Hospital NHS Foundation Trust, London, UK
2. Department of Biomedical Sciences, Humanitas University, Milan, Italy

### Deadline for manuscript submissions

17 April 2026

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
