

Special Issue

Combination Therapy in Geriatric Population with Cancer (2nd Edition)

Message from the Guest Editor

This Special Issue is the second edition of a previous one, entitled "Combination Therapy in Geriatric Population with Cancer"

(https://www.mdpi.com/journal/cancers/special_issues/1DYHD6A28E). Cancer has a higher chance of

developing with age. The increasing life expectancy of the population will, therefore, result in an increasing number of older patients with cancer. Treatment decisions in the older population are often challenging for various reasons. In this Special Issue of *Cancers*, we welcome original research articles or comprehensive review articles focusing on different treatments (including surgery, radiotherapy, chemotherapy, immunotherapy, targeted therapy, and combinations) for older patients with cancer, regardless of cancer type.

Guest Editor

Prof. Dr. Lore Decoster

Department of Medical Oncology, Universitair Ziekenhuis Brussel, Laarbeeklaan 101, 1090 Brussels, Belgium

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
