Treatment Intensification in Localized Prostate Cancer: What Route with What Car?

Message from the Guest Editors

For patients with prostate cancer (PCa) treated with radiotherapy, support for intensification with abiraterone and androgen deprivation therapy (ADT) is the new standard of care based on the STAMPEDE trial.

Nevertheless, appropriately intensified radiotherapy could be complementary or even an alternative to systemic intensification for selected patients. Evidence from contemporary randomized trials in high-risk prostate cancer shows that the intensification of prostate radiotherapy—via brachytherapy (ASCENDE-RT), intraprostatic boost (FLAME), or elective pelvic irradiation (POPRT)—results in 5 yr metastasis-free survival (MFS) of 90–95% with ADT alone. Results from ongoing trials evaluating the same strategy in the post-operative setting are awaited. The aim of this Topic Issue is to review evidence regarding treatment intensification in localized PCa, describing rationale, oncological outcomes, tolerance and perspectives.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
