Endoscopic Advances in Gastrointestinal Oncology

Message from the Guest Editor

Endoscopy has provided physicians with unprecedented access to the gastrointestinal tract, with implications for the management of all major oncological diseases in the gastrointestinal tract. With rapid advances in endoscopic technology, endoscopists are assuming an increasingly significant role in endoscopic oncology. The application of endoscopy affects many aspects of cancer management, ranging from the diagnosis of premalignant and malignant conditions to surveillance of premalignant conditions, the staging of cancers, definitive therapy for early-stage neoplasms, and palliation. This Special Issue is devoted to the current and future role of the endoscopic oncologist, with a focus on the latest endoscopic advances in the diagnosis, management, and treatment of premalignant and malignant gastrointestinal conditions.

Guest Editor

Prof. Dr. Eduardo Rodrigues-Pinto

Gastroenterology Department, Centro Hospitalar Universitário de São João, Porto, Portugal

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
