New Insights into Prostate Cancer Radiotherapy

Message from the Guest Editor

Prostate cancer is one of the most common types of cancer. Over the past few decades, radiotherapy has played a major role in the treatment of this disease. With the development of technology and long-term clinical experience, radiotherapy is widely applied in all clinical stages of the disease and has made significant advances in treatment. Ongoing research into radiotherapy could further improve cancer control and survival outcomes for patients with this cancer. This Special Issue focuses on the latest topics in radiotherapy for prostate malignancies, including the treatment of patients, basic research, clinical applications, etc., and will, hopefully, contribute to the advancement of current clinical and laboratory research on prostate cancer radiotherapy.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
