Advances in Thymic Tumors

Message from the Guest Editor

Thymus represents an organ with a remarkable spectrum of neoplastic diseases that derive from its epithelial, lymphatic, and mesenchymal components. Moreover, due to the crucial role of the thymic epithelium in the development of T lymphocytes, many epithelial tumors are accompanied by autoimmune disorders, the prototypical one being the thymoma-associated myasthenia gravis. The scope of this Special Issue includes but is not limited to pathogenesis, molecular characterization, and therapy of thymic epithelial and lymphatic tumors. Welcome are also manuscripts dealing with autoimmune diseases accompanying thymic tumors.

Guest Editor

Prof. Dr. Stefan Porubský

Institute of Pathology, University Medical Center of the Johannes Gutenberg University Mainz, Langenbeckstraße 1, 55131 Mainz, Germany

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
