Role of Antioxidants in Cancer Therapy

Message from the Guest Editor

Antioxidants in cancer prevention and therapy rank among the most controversial and misunderstood of all treatments of cancer. Conflicting data exist on whether antioxidants prevent or promote the development of cancer, and whether they help or hinder the response to chemotherapy. In this Special Issue, we will provide a framework for the role of antioxidants. This will involve clarifying what an antioxidant is and the role of timing and context. We believe this issue will be of interest to both basic scientists and clinicians who are treating patients with cancer, and patients who are taking over the counter supplements.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
