

## Special Issue

# The Role of Artificial Intelligence in Thyroid, Thoracic and Gastrointestinal Tumors: Transforming the Landscape of Diagnosis and Treatment

### Message from the Guest Editors

Artificial intelligence (AI) holds the potential to play a leading role in healthcare. To date, AI-based technology has revolutionized the diagnosis and management of cancer. Indeed, such advanced models can actually help enhance the accuracy of diagnosis for thyroid, thoracic and gastrointestinal malignancies. Apart from the fact that this novel technology can be used as a valuable tool to assist in identifying cancer earlier, it can also direct the evolution of medical imaging technology. Interestingly, AI software is particularly helpful in the treatment of these malignancies. This Special Issue aims to highlight the role of integrating AI algorithms in clinical practice to improve diagnostic accuracy and achieve better intra- and postoperative patient outcomes.

### Guest Editors

Prof. Dr. Michael I. Koukourakis

Department of Radiotherapy/Oncology, Medical School, Democritus University of Thrace, 68100 Alexandroupolis, Greece

Dr. Athanasia Mitsala

Second Department of Surgery, University General Hospital of Alexandroupolis, Democritus University of Thrace Medical School, Dragana, 68100 Alexandroupolis, Greece

### Deadline for manuscript submissions

31 October 2025

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
