Special Issue

The Role of Minimally Invasive and Minimally Radical Surgery in Cervical and Endometrial Cancer

Message from the Guest Editors

Randomized controlled trials that transform surgical practice within a global context are a rare phenomenon. Yet, in the field of surgical gynaecological oncology, we have been rewarded with a number of landmark studies in recent years, resulting in a series of hotly debated sessions at major conferences and an explosion of editorials in eminent journals. This Special Issue of cancers is in recognition of the work currently being undertaken by researchers across the globe in the fields of minimally invasive surgery as well as minimising surgical radicality in the treatment of cervical and endometrial cancer.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
