# Genetics of Endometrial Cancer: Latest Insights and Innovations in Research

### Message from the Guest Editor

Endometrial carcinoma, a prevalent malignancy in women, is marked by a growing incidence and mortality, emphasizing the need for an in-depth understanding of its genetic underpinnings for improved diagnostic and therapeutic strategies. The molecular classification of endometrial cancer, based on genetic findings, has identified four distinct subgroups exhibiting various genetic and immunohistochemical alterations. This classification holds significant clinical applications, influencing treatment protocols and patient outcomes. Nevertheless, there remains much to uncover about this genetically heterogeneous disease. We are pleased to invite you to share your findings and expertise on the diverse aspects of endometrial cancer genetics, from elucidating key genomic aberrations, biomarkers and innovative therapeutic targets to unraveling the intricate interplay between genetic factors and environmental influences, paving the way for more effective and personalized treatments. In this Special Issue, original research articles and reviews are welcome. I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
