Oncology: State-of-the-Art Research in Germany

Message from the Collection Editor

Among many other countries, Germany is at the forefront of cancer research. There are commitments from stakeholders from academic institutions, health service organizations, industries, funding bodies and public and patient advocacy groups to support research into all types of cancer. We have a unique National Health Service, which emphasizes the needs of everyone and is free at the point of delivery. It believes that integrating research into the health service organization will improve outcomes and transform cancer care. The German government proclaimed the “National Decade against Cancer”. Research is an important part of this fight against cancer. In this Special Issue, we aim to showcase state-of-the-art research in oncology in Germany. We invite submissions looking at all kinds of research covering all cancer types and stages, from basic laboratory research to translational and clinical research, including cohort studies, randomized controlled trials and epidemiological studies. Narrated reviews describing the history and significant contributions of cancer research in Germany are also welcomed.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
