Breast Cancer Metastasis: Novel Insights into Molecular Mechanisms and Treatments

Message from the Guest Editor

Breast cancer has become the most diagnosed cancer worldwide with about 685,000 deaths recorded in 2020. Metastases are responsible for approximately 90% of breast cancer-related deaths and, despite treatment advances, they remain largely incurable. We are pleased to invite you to contribute to this Special Issue entitled “Breast Cancer Metastasis: Novel Insights into Molecular Mechanisms and Treatments” that aims to provide the latest key findings in the field of basic and translational research on metastatic breast cancer. Research areas may include (but are not limited to) the following: cellular and molecular mechanisms regulating organ-specific metastasis and tumor dormancy, biomarker discovery, and advancements in therapeutic approaches for the various breast cancer subtypes, including small-molecule inhibitors and immunotherapy. We look forward to receiving your contributions.

Guest Editor

Dr. Delphine Denoyer

Matrix Microenvironment & Metastasis Laboratory, Translational Breast Cancer Program, Olivia Newton-John Cancer Research Institute, Melbourne, Australia

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
