

## Special Issue

# Recent Advances in Radiological Imaging for Head and Neck Squamous Cell Carcinoma

### Message from the Guest Editors

Head and Neck Squamous Cell Carcinoma (HNSCC), the seventh most common cancer globally, is characterized by poor prognosis and a poor survival rate. Radiological imaging, like computed tomography (CT), positron emission tomography (PET), or PET combined with CT, plays a vital role in the diagnosis and localization of primary tumors. This Special Issue aims to highlight the recent advances and clinical insights gained in multidisciplinary research in radiological imaging relevant to HNSCC. This Special Issue considers critical systematic reviews and original research articles encompassing technological developments, high-quality data generation, and advanced mathematical, statistical, and computational interventions to inform (a) innovations in radiomic workflows in image acquisition, reconstruction, segmentation, and pre-processing, as well as (b) applications of radiological images to aid in diagnosis, treatment modalities, and the management and prognosis of HNSCC patients.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
