

## Special Issue

# Novel Biomarkers in Pancreatic Cancer

### Message from the Guest Editors

The aim of this Special Issue is to collect the most relevant and recent findings in the field of the identification and development of novel biomarkers for pancreatic cancer. Furthermore, attention will be paid to contributions that highlight the potential role that novel biomarkers may have in guiding therapeutic decisions in the treatment of pancreatic cancer. Research articles reflecting the fields of “in vitro” diagnostics and prognostics are welcome, as well as clinically applicable high-throughput diagnostic technologies that can provide oncologists with innovative companion diagnostics.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
