

## Special Issue

# Biotechnological Approaches and Tools for the Development of Cancer Immunotherapeutics

### Message from the Guest Editors

With the growing medical demands of contrasting emerging diseases and cancer, medical biotechnology provides a plethora of innovative systems and strategies, with significant potential for rapid application to both therapeutic and diagnostic demands. Accordingly, future developments are expected in both basic research acquisitions and in the rapid translation of knowledge to exploitable results, aiming at the development of novel goods and services for cancer immunotherapy.

To face these challenges, the Special Issue “Biotechnological approaches and tools for the development of cancer immunotherapeutics” aims to attract leading-edge research in cancer immunotherapy, making use of both consolidated and innovative biotechnological tools and strategies with potential to impact on the immunotherapy of tumors.

This Special Issue of *Cancers*, therefore, will encompass new research articles and timely reviews on all aspects of basic and applied biotechnological research to increase the exploitable knowledge in cancer immunotherapy.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
