

## Special Issue

# Bone Metastasis in Breast Cancer

### Message from the Guest Editor

We are putting together a Special Issue focussed on breast cancer bone metastasis for publication in *Cancers*. For this issue, we would like to provide a mixture of data from clinical and pre-clinical studies in order to showcase recent developments in our understanding of this condition that will ultimately lead to improved patient benefit. We are interested in high quality original research or clinical reviews covering the following topics:

- Predictive biomarkers for bone metastasis.
- Mechanisms that promote breast cancer spread to bone.
- Immune cell regulation of breast cancer bone metastasis.
- Mechanisms of tumour cell dormancy in bone.
- Mechanisms of drug resistance in bone metastases.
- Novel therapeutic strategies/agents for treatment/prevention of bone metastasis.

We hope that by showcasing your new research we will help drive the development of better treatment options for patients with breast cancer bone metastasis.

---

### Guest Editor

Prof. Dr. Penelope Dawn Ottewell

Department of Oncology and Metabolism, University of Sheffield,  
Sheffield S10 2RX, UK

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
