

# Special Issue

## Innovation in Bone Metastasis

### Message from the Guest Editors

This Special Issue focuses on innovations in the field of bone metastases. The development of new biomaterials, new prostheses, and technologies for bone metastasis surgery is essential to improve the overall survival and quality of life of these patients. Basic, translational, and clinical research in this field holds promise to improve the quality of life and survival rates of patients with bone metastasis.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
