Special Issue

Breast Cancer: Early Detection and Prevention Strategies to Achieve Equity

Message from the Guest Editors

Breast cancer is now the most common cancer among women worldwide, accounting for 12% of all new annual cases (WHO, 2021).

The aim of this Special Issue of Cancers is to present studies that have tested successful interventions to increase the uptake of prevention and early detection strategies among populations that suffer from breast cancer disparities. Observational studies do not meet the requirements of this Special Issue.

Research areas may include (but are not limited to) the following related to breast cancer: interventions testing risk identification among women experiencing disparities; increasing uptake of genetic/counseling/testing; promoting the use of chemoprevention; diet/exercise/obesity interventions; screening/early detection interventions, such as testing new modalities and promoting mammography/MRI screening; assuring follow-up of abnormal screening test results.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
