Symptom Control and Palliative Care in Cancer

Message from the Guest Editor

Patients with advanced cancer often experience severe physical and psychological distress resulting in a significant impact on the patients' quality of life. Palliative and supportive care focuses on improving patients' symptoms, such as pain, and quality of life in patients with life-limiting illnesses irrespective of their prognosis. Other important aspects of palliative care are to facilitate effective communication between patients and clinicians and help to address moral and ethical dilemmas encountered in cancer care. In this Special Issue, we aim to discuss the advances in the field of symptom control and palliative care in cancer, with a focus on advances in the mechanisms, assessment, and management of cancer-related symptoms in patients with cancer. Additionally, the articles of this Special Issue will focus on the current challenges in the management of these palliative care issues and discuss strategies to overcome these challenges through education and research.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
