Current Advances in Surgical and Systemic Treatment of Breast Cancer

Message from the Guest Editors

Breast cancer is a common but heterogeneous disease, requiring a multidisciplinary approach to personalize its management. Recent advances have occurred across the whole spectrum of treatments. Surgical treatments include less invasive techniques, de-escalation of radical operations, and oncoplastic techniques. Systemic treatments adopt a more targeted approach given the discovery of a plethora of biomarkers and targeted agents. This Special Issue will highlight these advances, an appraisal of their evidence and applications in current and future clinical practices.

Guest Editors

Prof. Dr. Kwok-Leung Cheung

School of Medicine, University of Nottingham, Derby DE22 3DT, UK

Prof. Dr. Srinivasan Madhusudan

Translational DNA Repair Group Division of Cancer, Stem Cells School of Medicine, Nottingham University Hospitals, University of Nottingham, Nottingham NG7 3RD, UK

Deadline for manuscript submissions

23 July 2026

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
