Radiation Therapy in Lung Tumors: Recent Trends and Current Issues

Message from the Guest Editors

Radiation therapy still plays an important role in the management of patients suffering from lung tumors, with a series of breakthroughs in recent decades leading to major improvements in the outcome of patients. This is partially due to technical developments but also a better understanding of the disease and integration within a multimodal approach including surgery, chemotherapy and, more recently, immunotherapy. Another major component is certainly the many imaging modalities, including CT but mainly PET-CT, not only for the evaluation of the disease but also directly for radiotherapy planning. In the current issue, we are planning to present the current situation but also to outline future directions and paths to explore.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
