Multidisciplinary Approach to Bladder Cancer Treatment and Care

Message from the Guest Editors

Bladder cancer remains a challenge in surgery and oncology, demanding not only precise diagnosis and effective treatment but also a holistic approach that prioritizes the patient's overall well-being. In recent years, clinical practice has evolved dramatically, driven by advances in different aspects of medical and surgical treatment and care. Yet, the most meaningful progress emerges when these perspectives are integrated through a multidisciplinary strategy that brings together urologists, medical oncologists, specialist nurses, and other healthcare professionals. Healthcare professionals play a pivotal role in this collaborative framework, providing treatment, essential patient education, perioperative support, symptom management, and guidance throughout survivorship. "Multidisciplinary Approach to Bladder Cancer Treatment and Care" aims to highlight how combined expertise across all disciplines transforms research into clinical impact to improve the outcomes and quality of life of patients with bladder cancer.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
