

Special Issue

Perioperative Management and Cancer Outcome

Message from the Guest Editors

The special issue "Perioperative Management and Cancer Outcomes" explores the crucial role of perioperative care in improving cancer treatment results. It emphasizes the multidisciplinary approach, covering topics such as risk assessment, medical condition optimization, pain management, and postoperative follow-up. The issue aims to enhance understanding, inform clinical practice, foster collaborations, and inspire further research to optimize perioperative care and enhance cancer patients' recovery and survival rates.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
