

Special Issue

Advancing Health Equity to Reduce Cancer Health Disparities

Message from the Guest Editors

Achieving Cancer Health Equity via social and therapeutic interventions is required to address the racial gap in cancer incidence, disease aggressiveness, clinical and therapeutic outcome, and overall survival. Hence, we invite an article focused on cancer health disparity to achieve cancer health equity to reduce the racial gap in cancer by interventions at community and clinics by identifying specific molecular and cellular targets; SES impacting these targets.

We are pleased to invite you to submit your work addressing cancer disparity to gain cancer health equity. This Special Issue aims to publish original research articles, reviews, and editorials focused on basic, translational, and clinical studies on all tumor types addressing disparity. Research areas may include (but are not limited to) the following: Socioeconomic Status (SES) and Cancer, addressing cancer disparity using health informatics, Molecular basis of Cancer Disparity, racial differences in tumor immunity and cancer disparity, transcriptomes and cancer disparity, Association of SES with a cellular and molecular footprint of cancer impacting disease and therapeutic outcomes.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief
