

Topical Collection

Advances in Cancer Disparities

Message from the Collection Editors

In this Special Issue of *Cancers*, we aim to highlight advances in research that sheds light on overlooked cancer health disparities or demonstrates solutions to overcoming these challenges to equitable cancer care. We are pleased to invite you to submit your unpublished research on your field of cancer disparities. In this Special Issue, original research articles and reviews are welcome. The issue will highlight novel research focused on underappreciated cancer disparities among populations from racial, ethnic, sexual orientation, gender, or age (pediatric, AYA, elderly) minority populations, as well as those disproportionately impacted by structural and social determinants of health. The scope of the issue will cover any unpublished and novel cancer disparities research including but not limited to clinical trials, interventional studies, observational studies, methodological research, reviews, and perspectives. Topics may also include patient centric disparities including financial toxicity and patient reported outcomes. Research emphasizing the importance of data disaggregation and assessment of intersectionality is encouraged.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok
