Cardio-Oncology: Prevention and Care

Message from the Guest Editor

Recent advances in the early detection and treatment of cancer have led to increasing numbers of cancer survivors worldwide. To meet the growing demand for a specialized interdisciplinary approach for the prevention and management of cardiovascular complications induced by cancer treatment, a new discipline termed cardio-oncology has evolved. The relatively new subspecialty focuses on identifying cancer patients at risk for cardiovascular adverse events, the early detection and treatment of cancer-treatment-induced cardiac dysfunction (heart failure, arrhythmias, ischemia, etc.), and monitoring the long-term side effects induced by mediastinal radiotherapy and anthracycline treatment. This Special Issue will be dedicated to this new and rapidly evolving field. Here we welcome papers on pre-cancer treatment risk assessment as well as the early detection of cardiovascular complications during treatment, and encourage the submission of papers dedicated to the practical clinical implementation of cardio-oncology care.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
