The Chorioallantoic Membrane (CAM) Model – Traditional and State-of-the Art Applications: The 1st International CAM Conference

Message from the Guest Editor

Recently, the **chorioallantoic membrane (CAM) model** raised high attention in the field of tumor biology, imaging and cytotoxicity research, as it provides an attractive alternative animal model with respect to the 3R guidelines. We would like to discuss interesting and novel applications, the *pros and cons* of the model, as well as assay standardization and current rules and regulations. We expect an exciting virtual meeting encouraging all aspects of this model system. We are very happy to announce **this** Conference Special Issue in *Cancers*. The program committee will select the best and most interesting submissions for possible publication in this issue. For more information of this Conference, see

<https://express.converia.de/frontend/index.php?sub=681>

Guest Editor

Prof. Dr. Regine Schneider-Stock

Experimental Tumor Pathology, Institute of Pathology, University Hospital Erlangen, Universitätsstraße, Erlangen, Germany

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
