Early Detection and Surgery for Pancreatic Cancer

Message from the Guest Editors

In the past 10 years, the average 5-year survival for pancreatic cancer has increased from 5% to 11%. The lack of early detection and optimal therapy remain as consistent challenges. In this Special Issue, we aim to highlight work being carried out on the early biology of pancreatic cancer development, challenges in diagnosis, and advancements in treatment of early disease. We are pleased to invite you to contribute your work in the form of original research, meta analyses, or reviews. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: pancreatic cancer initiation, detection challenges, and surgical advances. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
